ATTN: To whom it may concern

RE: Jason Covington's job performance at the Army Aviation and Troop Command (ATCOM) on the Computer Resources Management Team

Mr. Covington has worked as a contractor for Westar Corporation on my Computer Resources Management Team for the past several months. In this time I have been able to become personally acquainted with him in addition to observing his professional conduct.

Mr. Covington has performed technical writing assignments and prepared important government presentations. He has been in charge of our record keeping and organization of our management team's work, including maintaining a database to assign and track all tasks within our group. In June Mr. Covington accompanied me to Mesa, Arizona to attend some meetings at McDonald Douglas Helicopter Systems. I am particularly impressed with Mr. Covington's superior oral and written communication skills and his ability to manage and interact with people.

Mr. Covington has an optimistic demeanor and is fun to work with. His level of integrity is rare, and I would recommend him for any job, particularly if it involves writing, organization, communication or management.

ATCOM is moving to Huntsville, Alabama next month and I will retire after 30 years. Out of the eight engineers on our team, there were only three slots available in Huntsville. I allocated one of these positions to Mr. Covington based on his superior performance, however, Mr. Covington has declined the position, preferring to remain in the St. Louis area.

I believe you will find that Mr. Covington is a real find for an employer, not only because of his diverse education and superior skills but because of his quality of character. Please contact me if you have any other questions.
