## OUR MISSION

Our mission is simple: Get the DUF<sub>6</sub> conversion plants to full and sustainable operations, to operate them safely, optimally and cost-effectively.

Our contract calls for conversion facility start-up and operations. We also assume responsibility for management of the DOE inventory of DUF<sub>6</sub>, LEUF<sub>6</sub>, NUF<sub>6</sub> and empty and heel cylinders at the sites.

### Under our contract, we have accountability for the following:

- Safely and efficiently operating the Paducah and Piketon facilities for the remaining length of the contract, and converting the Department's DUF<sub>6</sub> to uranium oxide, predominantly U<sub>3</sub>O<sub>8</sub>.
- Disposing and/or reusing all the DUF<sub>6</sub> conversion products and wastes while meeting all waste acceptance criteria (WAC).
- Selling the HF that is produced in the conversion process to commercial markets, or neutralizing the HF to a form acceptable for disposal and/or storage for future sales.
- Providing surveillance and maintenance (S&M) for DOE's inventory of UF<sub>6</sub> material stored in cylinders at Piketon and Paducah.
- Maintaining the DOE Cylinder Information Database (CID).
- Meeting regulatory and other applicable requirements for managing the UF<sub>6</sub> inventory, including
- Congressional mandates, Federal and state agreements, and agreements with the United States Enrichment Corporation (USEC).
- Protecting the health and safety of workers and the public and protecting the environment.
