

A Lifetime Supply of Free Water

Why Drill a Water Well?

Most of the fresh ground water in the world occurs in the top 200 feet and the average depth of all water tables in the U.S. is less than 100 feet! You can drill your own well and have access to all the water you'll ever need.

Many city residents are now drilling home water wells as an excellent alternative to chemical tasting municipal water. The quality of well water is simply unmatched. With city water rates soaring, well drilling provides an economical alternative. In most areas, you no longer have to worry about city water restrictions in times of drought - when you need water the most. With your own well, you are assured an abundant supply of water for use in your home or garden.

In many areas of the country, it is not unusual for a home water well to cost \$8,000 or more, if drilled by a commercial driller. Thanks to the Hydra-Drill, there's an easy, economical way for you to drill a water well. Most of our customers had no previous experience drilling a well before buying the Hydra-Drill. In addition, the Hydra-Drill is small and portable, and can be used in areas that large, commercial drilling rigs would have difficulty reaching without causing damage to your landscaping.

A Hydra-Drill pays for itself !

Even with today's soaring electric rates, you can pump approximately 1,000 gallons from your well for as little as 10 cents. In addition, the Hydra-Drill can dig multiple wells and save money for you, your family and neighbors. It doesn't take long to pay for a Hydra-Drill with the money you can save on your water bill.

When you buy directly from DeepRock, you get all the personal attention, service and advice that you want - absolutely free. Buying direct saves you 30% or more than what you'd pay if we sold the Hydra-Drill through stores or dealers. When you order a Hydra-Drill, you can be sure that you're dealing with people that believe in doing business with everyone like they were their hometown neighbors.

Since 1962, we've helped people from all 50 states and around the world get the water they needed at the lowest possible cost. At DeepRock, we are always ready to assist you with your drilling questions and needs.
