

Helping you get anyplace on earth

The Hummer H2 can do everything - from climbing a 16 inch vertical wall to climbing up a side of a mountain. With 9.7 inches of ground clearance, the H2 can gracefully clear obstacles, both on and off road. Need to cross a stream or shallow river? The H2 can ford an impressive 20 inches of water with the throttle in 4 Low Locked. Whether you are driving down main street with your precious family or off roading it with your buddies, you won't have to worry about your safety. The H2 comes standard with dual front air-bags and contains two stabilizer bars to help minimize body roll when cornering. The Hummer H2 is luxurious enough inside to make it a comfortable choice even if the furthest off road you take is your driveway. Come check out the H2 at www.hummer.com or call 800.732.5493 for more information.
