

14 February 2012

To Whom It May Concern:

I am pleased to offer this Letter of Recommendation for Mehdi (Matt) Amin-Rad. Mehdi worked as a contractor for PRG for ten (10) months. His duties included:

- Testing of pipe models in PCL-Gold pipe stress program
- Creation of Excel/VBA applications
- Import & Export of CAESAR II piping models in to and out of PCL-Gold
- QC report generation & verification of results based on each pipe model design
- Updated materials database for the B31.3 and B31.1 codes
- Assisted in various MS Access/VBA application development

The QC reports created by Mehdi were instrumental in the software debug process and the verification of result accuracy based on various piping and structural dimensions. I have found Mehdi to be knowledgeable and very capable in all tasks assigned to him. He was easy to work with and performed his duties in a timely and efficient manner. I would recommend him to any software development or IT department. He is a quick learner and has strong skills in MS Access/Excel/VBA as well as SQL and Paulin Research Group's proprietary software.

Best Regards,

A.W. Paulin, Jr.  
President
