To Whom It May Concern:

I would like to give my personal recommendation extended to Mehdi Aminrad, who worked as a contractor for me for 3 months. During that time I gave Mehdi various projects of linking data bases, share point access and folder security, active directory administration, and general help desk maintenance. I had him link access front ends to Sql back ends, on various application. I had him create Ms/Sql databases and tables and upgrade multiple access projects to be SQL applications. Mehdi performed very well in each of his tasks. I found him easy to work with, intelligent and knowledgeable in every project he was given. He did his work in a timely fashion and with very few corrections to make a final product. I would recommend Mehdi to any IT department for any position needed. He is a very quick learned in anything to do with Information Technology.
